PROFESSIONAL SUMMARY

Software Engineer with experience building production web applications, backend services, database-driven systems, ERP workflows, and business process automations. Proficient in Python, Django, React, SQL, REST APIs, PostgreSQL, AWS, Git, and Microsoft Power Platform; M.S. in Computer Science.

TECHNICAL SKILLS

Languages	Python, JavaScript, SQL, C
Frameworks	Django, Flask, FastAPI, React, Bootstrap, HTML, CSS, REST APIs
Data & Cloud	PostgreSQL, MySQL, AWS EC2, S3, IAM
Tools & Systems	Git, GitHub, Docker, Postman, Acumatica ERP, Microsoft Power Platform, SharePoint, Microsoft 365

PROFESSIONAL EXPERIENCE

IT Systems & Process Automation Specialist | Audio Acoustics **May 2026 - Present**
Springfield, MO

- Support Acumatica ERP processes, investigate system issues, and translate business requirements into workflow improvements.
- Build and maintain Microsoft Power Platform and SharePoint automations for forms, approvals, notifications, and integrations.
- Map processes, gather requirements, and implement data-driven workflows that reduce repetitive manual work.

Software Development Engineer | Missouri State University **May 2025 - May 2026**
Springfield, MO

- Developed and maintained production Django applications, implementing features, debugging issues, testing changes, and supporting deployments.
- Built a Django clock-in system that automated staff activity logging and reduced manual tracking.
- Developed Python, Django, PostgreSQL, and REST API functionality for application logic, queries, validation, and business workflows; contributed through Git/GitHub and Agile/Scrum practices.

UI Developer Intern | Maltech Solutions Pvt. Ltd. **Jun 2023 - Aug 2023**
India

- Developed reusable React and Bootstrap components, integrated REST APIs, and improved frontend performance by reducing redundant code and optimizing rendering.

PROJECTS

Email SpamChecker Web Application *React, FastAPI, PostgreSQL, AWS*
Built a full-stack email classification application, stored application data in PostgreSQL, deployed on AWS EC2, and configured GitHub Actions for automated testing and deployment.

Real-Time Weather Forecasting Dashboard *Django, JavaScript, REST API*
Integrated the OpenWeatherMap REST API with a responsive Django application for location-based forecasts and dynamic frontend rendering.

Student Elective Tracking System *Flask, MySQL*
Built database-backed registration and elective tracking for 200+ students with CRUD operations, input validation, and structured data management.

EDUCATION

Missouri State University | M.S. Computer Science | GPA: 3.62 / 4.00 **May 2026** | Springfield, MO

Bapatla Engineering College | B.Tech. Information Technology | CGPA: 8.69 / 10.00 **May 2024** | Bapatla, India

CERTIFICATIONS & AWARD

Microsoft Python Programming Certificate (2023) | **NPTEL:** Programming & Data Structures; Cloud Computing (2022) | **1st Place:** National Level Technical Quiz, Bapatla Engineering College (2023)
